About Transkriptor

Introducing Transkriptor, the pinnacle of transcription software, powered by cutting-edge A.I. technology. With **Transkriptor**, audio-to-text conversions become seamless, catering to diverse needs, from captioning digital content to transcribing journalist interviews. Whether you're attending a Zoom meeting or catching up on a podcast, our versatile platform, accessible via Android and iPhone apps, a Google Chrome extension, or a web page, ensures every word is accurately captured.

Bid farewell to manual meeting notes! Transkriptor's AI-powered assistant autonomously joins, records, and transcribes online meetings, allowing all team members to immerse themselves in discussions. But the innovation doesn't stop there; chat with the Transkriptor AI Assistant about any recorded conversations, be it videos or voice recordings, and receive instant answers, eliminating the need to sift through extensive transcripts or replays.

Embracing a global audience? Transkriptor shines with its multi-language support, offering transcriptions in 100+ languages and facilitating easy translations directly from the dashboard. Regardless of

your device or platform, be it Zoom, Microsoft Teams, or Google Meet, Transkriptor remains at your beck and call, ensuring a unified and secure storage for all your transcriptions.

Join the ranks of state officials, medical experts, marketers, doctoral candidates, and countless professionals from various fields who trust Transkriptor to make their communication efficient and effective. Choose Transkriptor; because every word matters.
