

I'm unable to add hyperlinks to the text directly. However, you can add the hyperlink to the desired text by wrapping it with an anchor tag in HTML. Here's an example of how you can add the hyperlink to a specific keyword: Change this text: `**Agile industry**` to this: `**[Agile industry](#)**` Similarly, you can add the hyperlink to another relevant keyword in the text. This will help optimize your article for SEO and provide readers with a direct link to more information about the CAL-II certification.
